

# BrightTV Viewership Analytics — Project Description

Customer Value Management (CVM) Case Study

BrightLearn Data Analytics Programme 2026

**Author:** Siyakha Ntuli

**Date:** June 2026

**Data Period:** January–March 2026

## 1. Project Background

BrightTV is a South African subscription television broadcaster... The CEO commissioned this analytics case study to grow subscriptions. The dataset contained two raw Excel tables covering January–March 2026 with 10,000 viewing sessions across 4,386 unique subscribers.

## 2. Business Questions

- What are the user and usage trends of BrightTV?
- What factors influence consumption?
- What content would you recommend to increase consumption on low consumption days?
- What initiatives would you recommend to grow BrightTV's user base?

## 3. Data Overview

Tables: bright\_tv\_user\_profile (5,376 rows) and bright\_tv\_viewership (10,001 rows). After a LEFT JOIN, 10,000 clean records remained. Data quality issues resolved: ghost profiles, duplicate UserID, UTC to SA time conversion, duration to minutes, unknown age/province flags, and invalid 29 Feb 2026 flag.

## 4. Methodology

**Phase 1:** Business Understanding

**Phase 2:** Data Understanding

**Phase 3:** Data Preparation

**Phase 4:** Analysis

**Phase 5:** Visualisation

**Phase 6:** Insights and Recommendations

**Phase 7:** Presentation and Delivery

## 5. Tools Used

| Tool                 | Purpose                            | Skill Demonstrated         |
|----------------------|------------------------------------|----------------------------|
| Databricks SQL       | Data ingestion, cleaning, analysis | SQL, Data Engineering, EDA |
| Microsoft Excel      | Pivot tables, charts               | Excel Analysis             |
| Power BI             | Interactive dashboards             | DAX, Dashboard Design      |
| Google Looker Studio | Web dashboards                     | Data Connectivity          |
| Miro                 | Planning                           | Project Management         |
| GitHub               | Version control                    | Version Control            |
| Microsoft Word       | Report                             | Business Writing           |
| PowerPoint           | Presentation                       | Data Storytelling          |

|          |                       |                               |
|----------|-----------------------|-------------------------------|
| Loveable | Interactive dashboard | React, Recharts, Tailwind CSS |
|----------|-----------------------|-------------------------------|

## 6. Key Findings Summary

- 4,386 subscribers • 10,000 viewing sessions • 87,210 minutes watched
- 84.88% male, 11.13% female (7:1 imbalance)
- Adults (30–59): 2,570 subscribers
- Gauteng highest (1,607); Northern Cape (82), Free State (147), North West (152) lowest.
- Month-on-month growth: 192%; Peak viewing: 17:00; Saturday strongest; Monday weakest.
- Most watched: ICC Cricket World Cup 2011 (24,083 minutes); SuperSport Live Events second (18,108); Top 2 channels account for 48% of consumption.

## 7. Recommendations Summary

- Female acquisition campaign
- Teen girl targeting
- Family bundle strategy
- Reduce cricket dependency
- Invest in Trace TV
- Regional campaigns in NC, FS and NW
- Improve Monday/Tuesday scheduling
- Expand multilingual content
- Invest in Mpumalanga
- Kids content partnerships
- Premium scheduling at 17:00–19:00
- Replicate March growth drivers
